SUMMARY

Full-stack junior web developer by way of marketing. Began as a self-taught front-ender, and went on to earn a certificate in full stack development through Rutgers University. Passionate about bringing creativity, collaboration, and logic together in order to effectively solve problems. Experienced in coordinating diverse teams that work toward separate but collective goals. Proven ability to remain calm and collected in any given situation and provide support for those who need it. Meticulous eye for details. Motivated for continuous learning.

PROJECTS

Deetz | https://github.com/mpaitgt/deetz | https://github.com/mpaitgt/deetz
- An internal business application that acts as a hub for database management, allowing consistency and accuracy across business platforms
- Responsible for the front-end design and back-end routing and authorization
- Tools / Languages used: Node.js, Express, Handlebars, Sequelize

Medo | https://github.com/mpaitgt/Project_1 | https://mpaitgt.github.io/Project_1/
- A mobile-friendly web application that serves as a media to-do list. Now, you'll never forget that movie you've been meaning to check out
- Responsible for the Javascript functionality, AJAX calls, and data persistence
- Tools / Languages used: jQuery, Firebase, AJAX, Moment.js

EMPLOYMENT

Digital Content Specialist | April 2018 – Present   HearingLife | Somerset, NJ
Promoted from Marketing Coordinator

- Streamlined campaign timelines by blending the production process and data trafficking into a singular process as Marketing Coordinator
- Improved field communications by developing more clear and concise internal marketing materials, helping to bring a better understanding of our programs to internal stakeholders
- Implemented an organized and consistent reporting process for external vendors, bringing insight into the way we operate in order to improve decision-making
